

Administration Office Nordic World Ski Championships 2015 Falun

Falun, Sweden

From 18th February to 1st March, the 50th Nordic World Ski Championships will be held in Falun, Sweden. This year, the organisational planning of the winter sports highlight will take place in a building built by Stora Enso. The environmentally friendly, two-storey building is a striking example of the versatile uses of Stora Enso products. The building was constructed using high-quality CLT building material (Cross Laminated Timber). Other Stora Enso products were used, e.g. components for windows and doors as well as ThermoWood for the exterior cladding and Effex for the flooring.

Office Building Concept by Stora Enso

The office buildings of the future are made of wood.
