Haus am Hang Pinkafeld, Austria

Partner of Stora
Enso

The house rests on stilts on a steep slope. The warm living area, elevated on one level, has a spacious covered outdoor area. The well-designed and well-thought-out visual axis, coupled with high-quality application, creates a harmonious home. The structural mix of solid timber and timber frame components complement each other beautifully.

The roof is made of mass timber elements, while the exterior and interior walls are constructed using timber frame construction.
