

Sport stadium and leisure complex Suchet Paris, France

The CLT massive wood construction is the key to an ecological building concept. This newly constructed sport stadium and leisure complex Suchet, France comprises 2 370 m². CLT ensures a fast and easy construction and contributes to a better indoor climate. The completion was in 2015 and a total of 133 m³ CLT by Stora Enso was used for this construction project. This sport stadium won the award "National Wood Construction Prize 2018": Finalist in the "Learn - Entertain" category.
