Weekend hideaway

Thurnberger Stausee, Austria

A special type of weekend refuge has been built at Thurnberg reservoir, one of three reservoirs in Kamp Valley, Lower Austria. The developers came up with a very plain and simple design with distinct wooden and concrete forms and large open windows. The shape of the building, which has a surface area of just 75 m², a black façade and a gable roof, is based on that of rural barns and stables in the surrounding area. The house was built using 25 m³ CLT by Stora Enso of visible quality (VI).
