

Hotel Alpin Juwel

Saalbach Hinterglemm, Austria

The four-star superior Hotel Alpin Juwel was opened on 12 December 2012 in Saalbach Hinterglemm, Austria. Stylish and sustainable living characterises this hotel for which CLT is the ideal construction material. In particular, the advantages of using CLT, such as short construction periods and no drying times, make this building material ideal for hotel projects, the majority of which must be built during the low season.
