

Gemeinlebarn

Gemeinlebarn, Austria

The complex, which comprises five two-storey building structures with a total of 29 accommodation units, is set in the centre of an extensive green area with its own natural habitat. It was completed in 2011. The buildings' supporting structure was built using CLT by Stora Enso construction methods with solid wood ceilings and walls.

Residential Multi-storey Building Concept by Stora Enso

Multi-storey buildings in massive wood are high-performing, renewable structures that can help to meet the growing demand for new urban buildings and more efficient, sustainable construction.
