

Partner of Stora Enso

Single Family House Eraso

Eraso, Navarra

The main family house (300 years old), next to the new house, is built with noble and natural materials (stone and wood). So the clients decided to use similar materials in the new house, also in traditional style. The new house has also been built with natural materials and is heated by underfloor heating. The building has been designed and built for energy efficiency class A. 85 m³ of CLT by Stora Enso were used for this building and was completed in 2014.
