## Kals am Großglockner, Austria

The Kals am Großglockner Hotel, which is set 1,350 meters above sea level, opened its doors in December 2012. Guests are immediately captivated by the architecture's straight and clearly defined lines. Inside the building, indigenous spruce CLT creates a warm and welcoming atmosphere, while the outside is clad in wood shingle. The entire project is geared towards sustainability, which is also demonstrated by the associated wood chip heating system.
