

Warehouse for Digitec Galaxus AG

Wohlen, Switzerland

The Swiss company Digitec Galaxus AG in Wohlen is the market leader in IT, consumer electronics and telecommunication. The companies continued growth in the online trading led to the need to increase its storage capacities. Two suspended ceilings made of CLT massive wood have been added to the 120 × 50 m existing building. It took just 10 weeks to realize this project. The CLT volume of 1,700 m³ makes that project Switzerland's largest CLT building to date.
