Paupys Business Centre

Vilnius, Lithuania

Welcome to the Paupys Business Centre, a mixed-use industrial conversion consisting of business and residential areas and a stylish urban bazaar, art gallery and venues for public events. There is a lot to admire!

We would like to focus your attention on this picturesque terrace on the roof though. It is the perfect place to unwind after a demanding working day or during breaks while enjoying the panorama of the river, district and old part of Vilnius.

The oasis of greenery on the roof of the Paupys Business Centre, was designed by Plazma Architects, creates a natural extension of the public spaces. It is a fragrant and inspiring relaxation area that opens up the horizons of Vilnius.

The finishing and the benches are made with [ThermoWood® by Stora Enso](#). The terrace has concealed fixings, without any coatings it is completely natural. The invisible fixings, stable dimensions, and smooth surface require no additional maintenance.
