

# Lapinmäki

## Helsinki, Finland

The Lapinmäki kindergarten in Helsinki is the first CLT kindergarten project for Stora Enso in Finland. The two-storey building will be built with CLT massive wood by Stora Enso. Altogether, the project comprises 400 m<sup>3</sup>. The modern construction material has an extremely welcome side effect: the healthy climate within wooden structures creates a particularly pleasant indoor environment and has a demonstrably positive effect on residents' wellbeing.

### School Concept by Stora Enso

Let's build a learning environment for the next generation.
