# Bureaux Australis2

## Basse-Goulaine, France

Australis2 is an office building delivered in 2021 close to the city of Nantes.

The project build-up is made out of wooden-frame walls and a green roof in LVL Rib Panel open type.

The main advantage of LVL Rib Panel roof was a pretty quick and efficient installation. It also lightens the structure.

Choice was made to let the Rib Panels visible from the ceiling and painted in black, which give a pretty nice aesthetic to the interior of office.
