

Trainings Center JACER

Ústí nad Labem, Czech Republic

In this particular project, an old horse stable has been converted into a modern training center for the timber industry. On the ground floor all the old stone walls have been preserved in their original state, which gives this building originality. However, the first floor was completely constructed with Stora Enso CLT in visual quality.

School Concept by Stora Enso

Let's build a learning environment for the next generation.
