

Slottet

Falun, Sweden

The wooden health building for elderly and disabled people Slottet in Falun (Sweden) was built in 2019. The envelop was built in timber frame and for the load bearing structure was used CLT massive wood by Stora Enso. Altogether, the project comprises 4 000 m². The modern construction material has an extremely welcome side effect: the healthy climate within wooden structures creates a particularly pleasant indoor environment and has a demonstrably positive effect on the well-being. A total of 852 m³ CLT by Stora Enso was used for this construction project.
