

Market Hill Primary School

Turriff - Aberdeenshire, United Kingdom

The primary school consists of two 54 m-long teaching wings, constructed using a glulam portal frame, with a sports hall built with CLT and racking panel walls adding stability to the building. Internally, the majority of the timber beams and panels have been left exposed, giving the school a welcoming feel. Stora Enso supplied a total of 188 m³ of CLT by Stora Enso for integration into the structure of the school building.

School Concept by Stora Enso

Let's build a learning environment for the next generation.
