Entrepatrios Las Carolinas

Madrid, Spain

The residential building "Entrepatrios Las Carolinas" in Madrid, Spain is characterized by the usage of CLT-massive wood elements. Fruit of the initiative of a social housing cooperative, built with collaborative, ecological and low energy consumption criteria as an alternative to standard real estate. In addition to the positive environmental effects the CLT massive wood elements by Stora Enso create a comfortable working atmosphere for the employees. The completion of the project was in 2020, altogether the residential building comprises 900 m².

Residential Multi-storey Building Concept by Stora Enso

Multi-storey buildings in massive wood are high-performing, renewable structures that can help to meet the growing demand for new urban buildings and more efficient, sustainable construction.
