

Parking garage for cycles

Uppsala, Sweden

The special wooden Parking garage for cycles in Uppsala (Sweden) is characterized by the usage of CLT-massive wood elements and Glulam for the complex structure. CLT by Stora Enso ensured a fast and easy construction for this project, which was perfectly executed by all assembly involved partners. A total of 350 m³ CLT by Stora Enso in Industrial visible quality (IV) was used for this construction project. The completion of the project was in 2018, altogether the wooden project comprises 2 800 m².
