

Temporary housing

Zolling, Germany

CLT by Stora Enso was used to build temporary housing based on a modular concept in Zolling near Freising. The modules can be individually combined and therefore adapted to suit all needs and local conditions. Although the original plan was to use steel containers, it was ultimately CLT by Stora Enso that was chosen to build the two three-storey buildings which are designed to accommodate 150 persons.

Residential Multi-storey Building Concept by Stora Enso

Multi-storey buildings in massive wood are high-performing, renewable structures that can help to meet the growing demand for new urban buildings and more efficient, sustainable construction.
