

StoraEnso

Nardinai

Vilnius, Lithuania

Let us introduce you to Nardins! An art project by Lithuanian artist, Vladas Suntsov and installed with the help of the Baltic Air Force. This sculptural piece combines architecture and archaeological research to create a small-scale recyclable wood installation made with ThermoWood®.

ThermoWood is known for its long service life and requiring little to no maintenance—perfect for an outdoor installation that will last for many years and be used by many people.
